Dear Sir or Madam,

I graduated from Technical University of Wroclaw (Poland) Warsaw with a bachelor's degree and Belarusian National Technical University with a master degree. My experience of working for the company over the years has shown my creativity and good skills, which I believe would be of great help while working as a designer in your company. For the last few years, I have been consistently developing my skills and experience of working in AutoCAD and AutoCAD 3D including in the creation of automatic blocks. Through these years I have successfully completed many projects working alone, as well as in a group, so I can tell that I have good social skills. I work quick and smart, and I always get things done before the deadline. Additionally, I have a driving licence. I speak fluent Russian, Polish, Germany. Average level of English. For me this is the last language I learn. I have my own specifics of learning languages. I'm willing to work for \$27 an hour.

Should you require any additional information, please do not hesitate to contact me.

Yours faithfully,
Mit freundlichen Grüßen,
С уважением,
Z poważaniem,

Witalij Sawicki
